TTO Senior Programme

Your gateway to the international community!

It is through education that young adults make contact with the world around them. TTO serves to expand their horizons in a tangible way, making their encounter an enriching experience. Students acquire an excellent and interdisciplinary command of English. They become self-reliant, critically thinking and responsible individuals on the world's stage.

TTO Senior Programme

You will continue to go with the tto-flow. Our complete three-year upper forms programme focuses on: Personal development, Global citizenship and English-language skills

In this programme you explore topics related to science, politics, culture and more!

At the end of your secondary-education career you will not only have a set of internationally-recognised diplomas but also a skillset to prove you are more than ready for any university.

IB English A: Language and Literature

Ever wondered what makes a great speech memorable, what makes the Coca-Cola commercials so appealing or how literature captures your imagination? IB has you covered.

IB English A, Language and Literature delves deeper into how various literary and non-literary texts from present and past tell their stories and present their messages.

You will explore literary texts, see how current issues have been represented by famous authors and improve all your English-language skills.

Furthermore, you can acquire more Cambridge certificates, by doing the Cambridge Advanced and Proficiency exams.

Global Perspectives

Global Perspectives helps broaden your worldview, encouraging you to look critically at different global issues from different points of view.

One of the most interesting facts about *Global Perspectives* is, that it is taught by teachers from many different subjects. Each teacher will add their own experience and expertise, making *Global Perspectives* especially diverse.

Over the course of 2 years, you will approach global issues collaboratively and individually to become an internationally-minded person.

You will also have the opportunity to prepare for and attend a Model United Nations debate conference abroad.

Practicalities

Extra activities include excursions, exchange programme, projects and advanced (optional) Cambridge exams, international work experience, CAMMUN in England.

Closing statement

Completing this TTO senior programme shows that you've challenged yourself and are well prepared to succeed in your other subjects at school, as an undergraduate at university, and in your future career. You will be prepared to participate in a global society.
